

Environmental Policy

As part of our commitment to achieving the principles of environmental sustainability, we recognise our moral and legal responsibility to ensure that our activities and operations avoid harm to the environment.

Mader is committed to environmental improvement and prevention of pollution and will work with its customers, suppliers and the community to adopt procedures that:

- Reduce waste through innovative work practices and recycling practices.
- Minimise the impact of our operations on the neighbouring community.
- Increase the use of environmentally acceptable materials, equipment and technology in place of those which are considered harmful.
- Ensure that our suppliers follow acceptable environmental policies, and
- Actively promote environmental awareness among staff, clients, customers and the general public.

Mader recognise that their overall responsibility with environmental sustainability rests with management, who will be accountable for the implementation of this policy. These responsibilities include:

- To ensure that all employees and subcontractors conform to relevant requirements of the Environmental Policy.
- Establishing objectives and targets to ensure continued improvement aimed at the elimination of waste, pollution and environmental harm.
- Encouraging consultation and co-operation between management, employees and stakeholders in matters which may affect or impact on the environment.
- Provide training to employees relative to this environment protection policy and associated procedures and work instruction.
- Providing adequate resources to meet these environmental commitments.

Mader is totally committed to the achievement of zero environmental incidents during its operations.

A handwritten signature in black ink, appearing to read "Gary Wotherspoon", is written over a light blue circular stamp.

Gary Wotherspoon
Chief Operating Officer
